

Ingestion Pipeline

Listen for Test Event.

The screenshot shows the 'IngestionWebhook' interface. On the left, there's a 'Listening for test event' section with a 'Make a POST request to:' field containing the URL `https://ensmedia.app.n8n.cloud/webhook-test/checkout-event` and a 'Stop Listening' button. On the right, the 'Parameters' tab is active, showing 'Webhook URLs' with a 'Test URL' and 'Production URL'. The 'Test URL' is `https://ensmedia.app.n8n.cloud/webhook-test/checkout-event`. The 'HTTP Method' is 'POST'. The 'Path' is 'checkout-event'. The 'Authentication' is 'None'. The 'Respond' section shows 'Using 'Respond to Webhook' Node'. The 'Options' section has a '+ Add option' button. On the far right, the 'OUTPUT' tab shows a table with headers: 'headers', 'params', 'query', and 'body'. The 'body' column contains the following data:

headers	params	query	body
<code>host : ensmedia.app.n8n.cloud</code> <code>user-agent : Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/151.0.0.0 Safari/537.36</code> <code>content-length : 103</code> <code>accept : */*</code> <code>accept-encoding : gzip, br</code> <code>accept-language : en-US,en;q=0.9</code> <code>cdn-loop : cloudflare; loops=1; subreqs=1</code> <code>cf-connecting-ip : 106.51.118.90</code> <code>cf-ew-via : 15</code> <code>cf-ipcountry : IN</code> <code>cf-ray : a2a476995bb183f3-BLR</code> <code>cf-visitor : {"scheme":"https"}</code> <code>cf-worker : n8n.cloud</code> <code>content-type : application/json</code> <code>origin : null</code> <code>priority : u=1, </code> <code>sec-ch-ua : "Not-A.Brand";v="99", "Google Chrome";v="151", "Chromium";v="151"</code> <code>sec-ch-ua-mobile : ?0</code>	<code>{empty object}</code>	<code>{empty object}</code>	<code>checkout_step : SHIPPING</code> <code>cart_value : 135672</code> <code>device : MOBILE</code> <code>source_tag : preset_mobile_pattern</code>

Here the event chosen is for Mobile Payment

The 'EVENT DETAILS' form is shown. It has a 'PRESETS' section with buttons for 'Low value / Address', 'Payment failure', 'High cart value', 'Mobile pattern', and 'Invalid payload'. The 'Mobile pattern' button is highlighted. Below the presets, the 'EVENT DETAILS' section is circled in red. It contains the following fields:

- Checkout step**: A dropdown menu with 'SHIPPING' selected.
- Device**: A dropdown menu with 'MOBILE' selected.
- Cart value**: A text input field containing '135672'.
- Source tag** (traceability only — not used in severity logic): A text input field containing 'preset_mobile_pattern'.

At the bottom of the form is a 'SEND EVENT' button.

So Send Event.. it will give response below after sending it.

Send a checkout event

Fires a test POST at your n8n Agent 1 webhook, exactly like a real checkout would. Fill in the fields or tap a preset, then send.

Webhook Target

Webhook URL

<https://ensmedia.app.n8n.cloud/webhook-test/checkout-event>

Use the Production URL, once the workflow is Activated, or the Test URL while "Listen for test event" is running in the editor.
