Sample n8n Screenshots – After complete Execution

The chat window now displays the latest execution data following a successful end-to-end retrieval cycle. Note that during initial ingestion, the chat remains empty until the prompt data is successfully stored in the vector database.

Ingestion end – Insert Index – Window Node by Node Results

Ingestion Pipeline Execution with execution Timeline is seen here

The screenshot displays the n8n interface for the 'Ingestion Pipeline'. The left sidebar shows a list of executions, with the most recent one at 'Aug 14, 13:27:22' being successful in 62ms. The main workspace shows the pipeline diagram with nodes like 'Schedule Trigger', 'Search files and folders', 'Download file', 'PineconeVectorStore-IngestionNode', 'Embeddings OpenAI', and 'Recursive Character Text Splitter'. The 'Chat' window at the bottom left contains a prompt: 'What are the areas to focus and what are your recommendations?' and a response: 'NovaPhone X1 is already the largest revenue contributor, so focus on maintaining its premium positioning and innovating to stay ahead in the flagship segment. Recommendation: Invest in new features and marketing for NovaPhone X1 to defend and grow its dominant market share.' The 'Logs' panel on the right shows a detailed timeline of the execution steps, including 'Schedule Trigger', 'Search files and folders', 'Download file', 'PineconeVectorStore-IngestionNode', 'Default Data Loader', 'Recursive Character Text Splitter', and 'Embeddings OpenAI'.

Search Files and Folders

This screenshot shows the n8n interface with the 'Search files and folders' node selected. The left sidebar shows the execution history. The main workspace displays the pipeline diagram. The 'Chat' window shows the same prompt and response as the previous screenshot. The 'Logs' panel on the right shows the execution timeline, with the 'Search files and folders' node highlighted. The 'OUTPUT' panel on the right shows the results of the search, listing two files: 'NovaCart Company Annual Report 2024.docx' and 'SKULWeekly_Sales_Conversion_3Y_with_Revenue.docx'.

pageContent NovaCart Company Report in 1 Company Overview

Default Data Loader

The screenshot shows the 'Default Data Loader' workflow in a low-code platform. The workflow is titled 'Default Data Loader' and is published. It consists of several steps: 'Schedule Trigger' (1 item), 'Search files and folders' (2 items), 'Download file' (2 items), 'PineconeVectorStore-IngestionNode' (1 item), 'Embeddings OpenAI' (1 item), 'Default Data Loader' (1 item), 'Recursive Character Text Splitter' (1 item), and 'Embeddings OpenAI' (1 item). The workflow is shown in a 'Success' state with a duration of 5.856s. The 'Default Data Loader' node is highlighted, showing its configuration: 'Type of Data' is 'Binary', 'Mode' is 'Load All Input Data', 'Data Format' is 'Automatically Detect by Mime Type', 'Text Splitting' is 'Custom', and 'Options' are empty. The 'Recursive Character Text Splitter' node is also highlighted, showing its configuration: 'Type of Data' is 'Text', 'Mode' is 'Load All Input Data', 'Data Format' is 'Automatically Detect by Mime Type', 'Text Splitting' is 'Custom', and 'Options' are empty. The 'Embeddings OpenAI' node is also highlighted, showing its configuration: 'Type of Data' is 'Text', 'Mode' is 'Load All Input Data', 'Data Format' is 'Automatically Detect by Mime Type', 'Text Splitting' is 'Custom', and 'Options' are empty. The 'Default Data Loader' node is also highlighted, showing its configuration: 'Type of Data' is 'Binary', 'Mode' is 'Load All Input Data', 'Data Format' is 'Automatically Detect by Mime Type', 'Text Splitting' is 'Custom', and 'Options' are empty. The 'Recursive Character Text Splitter' node is also highlighted, showing its configuration: 'Type of Data' is 'Text', 'Mode' is 'Load All Input Data', 'Data Format' is 'Automatically Detect by Mime Type', 'Text Splitting' is 'Custom', and 'Options' are empty. The 'Embeddings OpenAI' node is also highlighted, showing its configuration: 'Type of Data' is 'Text', 'Mode' is 'Load All Input Data', 'Data Format' is 'Automatically Detect by Mime Type', 'Text Splitting' is 'Custom', and 'Options' are empty.

Default Data Loader – Node when Opened in full

The screenshot shows the 'Default Data Loader' node configuration and output. The node is titled 'Default Data Loader' and is published. It consists of several steps: 'Schedule Trigger' (1 item), 'Search files and folders' (2 items), 'Download file' (2 items), 'PineconeVectorStore-IngestionNode' (1 item), 'Embeddings OpenAI' (1 item), 'Default Data Loader' (1 item), 'Recursive Character Text Splitter' (1 item), and 'Embeddings OpenAI' (1 item). The workflow is shown in a 'Success' state with a duration of 5.856s. The 'Default Data Loader' node is highlighted, showing its configuration: 'Type of Data' is 'Binary', 'Mode' is 'Load All Input Data', 'Data Format' is 'Automatically Detect by Mime Type', 'Text Splitting' is 'Custom', and 'Options' are empty. n8n – Chat First Prompt Output Response seen on the right Corner

The screenshot displays the n8n workflow editor for a project named "02-RAG-NovaCartRAGIngestionANDRetrievalPipelines". The left sidebar shows a list of executions, with the most recent one at "Aug 14, 13:27:22" marked as "Error in 590ms". The main workspace shows two workflow diagrams: "RAG Ingestion Pipeline" (yellow background) and "Retrieval Pipeline" (green background). The "Retrieval Pipeline" is active, showing a sequence of steps: "When chat message received" (1 item), "Agent Brain OpenAI Chat Model" (2 items), "Memory" (2 items), "PineconeVectorStore-R..." (2 items), "Embeddings OpenAI" (2 items), and "Reranker Cohere" (2 items). The "Agent Brain OpenAI Chat Model" step is expanded, showing its input and output. The input is a system message: "System: You are a retrieval-augmented assistant for NovaCart. YOU MUST FOLLOW THIS PROCEDURE FOR EVERY NON-GREETING USER MESSAGE: Step 1 ALWAYS call the tool 'Nova Pinecone Vector Index' exactly once before answering. Step 2 Read the tool result. If the result is empty OR does not contain the requested metric/timeframe, you MUST reply EXACTLY: 'I'm sorry, I don't have that information in my knowledge base. Please try asking a different question.' You are NOT allowed to respond with anything else in this case. Step 3 If the tool result contains relevant information: Answer using ONLY the retrieved text. Keep the answer short and sweet. Sometimes you might be asked to do comparison with other products from other vendors. In those cases use the built in Web Search Tool to accomplish that. OUTPUT RULES (final response): Output ONLY the user-facing answer text. Share output in bullet points. NEVER mention tools." The output is a response from the "Agent Brain OpenAI Chat Model": "NovaPhone X1 is NovaCart's premium flagship smartphone. It consistently generates the highest weekly revenue among all product lines, mainly due to its elevated unit price. Targets the high-end market segment and is positioned as a leading product in the NovaCart portfolio." A red checkmark is visible next to the output.

n8n – Chat Second Prompt Output Response seen on the right Corner

The screenshot displays the n8n workflow editor for the same project. The left sidebar shows a list of executions, with the most recent one at "Aug 14, 13:27:22" marked as "Error in 590ms". The main workspace shows the same workflow diagrams. The "Retrieval Pipeline" is active, showing the same sequence of steps. The "Agent Brain OpenAI Chat Model" step is expanded, showing its input and output. The input is the same system message as in the first screenshot. The output is a response from the "Agent Brain OpenAI Chat Model": "NovaPhone X1 generated the highest revenue at USD 1.62 billion, with about 1.9 million units sold and an average selling price of USD \$82. This represents 57% of NovaCart's total revenue, making it the primary revenue driver. Other product lines: Smart Home Devices: USD 486 million (17% of revenue) Wearables: USD 398 million (14% of revenue) Subscription Services: USD 336 million (12% of revenue) Lagging product lines are Wearables and Subscription Services, each contributing far less to total revenue compared to NovaPhone X1. NovaPhone X1 significantly outperforms other categories in both revenue and market impact." A red checkmark is visible next to the output.

OUTPUT

1 item

NovaPhone X1 is already the largest revenue contributor, so focus on maintaining its premium positioning and innovating to stay ahead in the flagship segment. Recommendation: Invest in new features and marketing for NovaPhone X1 to defend and grow its dominant market share. Logging areas are Wearables (NovaFit Active Watch) and Subscription Services (NovaCart Essentials). Recommendation: Enhance product differentiation and customer value for Wearables and Subscriptions, consider bundling offers or cross-promotions to boost sales in these segments. Explore partnerships, improve value propositions, and target new customer demographics to stimulate growth in lower-performing categories.

Novacart AI Agent

The screenshot displays the Novacart AI Agent interface. On the left, a list of executions shows various timestamps and success/failure status. The main area features a workflow diagram with components like 'Schedule Trigger', 'Search files and folders', 'Download file', 'PineconeVectorStore', 'Embeddings OpenAI', 'Default Data Loader', 'Recursive Character Text Splitter', 'Agent Brain OpenAI Chat Model', 'Memory', 'PineconeVectorStore', 'Embeddings OpenAI', and 'Reranker Cohere'. Below the diagram, a chat window shows a user query: 'What are the areas to focus and what are your recommendations?' and a response: 'NovaPhone XT is already the largest revenue contributor...'. The right side shows the output of the agent, which is a detailed recommendation for NovaPhone XT, including suggestions for investment in new features and marketing, and product differentiation.

Its System Message Prompt

You are a retrieval-augmented assistant for NovaCart.

YOU MUST FOLLOW THIS PROCEDURE FOR EVERY NON-GREETING USER MESSAGE:

Step 1) ALWAYS call the tool "Nova Pinecone Vector Index" exactly once before answering.

- The tool input must be a short search query derived from the user's question (5–12 words).

- Do NOT answer yet.

Step 2) Read the tool result.

- If the result is empty OR does not contain the requested metric/timeframe, you MUST reply EXACTLY:

"I'm sorry, I don't have that information in my knowledge base. Please try asking a different question."

- You are NOT allowed to respond with anything else in this case.

Step 3) If the tool result contains relevant information:

- Answer using ONLY the retrieved text.

- Keep the answer short and sweet.

Sometimes you might be asked to do comparison with other products from other vendors. In those cases use the built in Web Search Tool to accomplish that.

OUTPUT RULES (final response):

- Output ONLY the user-facing answer text.

- Share output in bullet points

- NEVER mention tools, retrieval, search, "used tools", logs, inputs, outputs, metadata, or reasoning.

- You are forbidden from printing anything like: [Used tools: ...].

EXCEPTION:

- If the user message is only a greeting/small talk (e.g., "hi", "hello", "how are you"), do not call the tool; respond politely.

Memory (Chat History) – Shows the entire saved memory of this published instance for the prompts done earlier

NovaPhone X1 is already the largest revenue contributor, so focus on maintaining its premium positioning and innovating to stay ahead in the flagship segment. Recommendation: Invest in new features and marketing for NovaPhone X1 to defend and grow its dominant market share. Lagging areas are Wearables (NovaF Active Watch) and Subscription Services (NovaCart Essentials). Recommendation: Enhance product differentiation and customer value for Wearables and Subscriptions, consider bundling offers or cross-promotions to boost sales in these segments. Explore partnerships, improve value propositions, and target new customer demographics to stimulate growth in lower-performing categories.
